Perchè questo tema?

La felicità è stata descritta come uno stato di benessere caratterizzato da relativa stabilità, da sentimenti che vanno dal semplice appagamento a un'intensa gioia di vivere e dal naturale desiderio che questo stato persista. Non essendo limitata a un benessere momentaneo, la felicità è più simile a un viaggio che a una destinazione. Ma è veramente possibile misurare la felicità mondiale? Ci abbiamo provato!

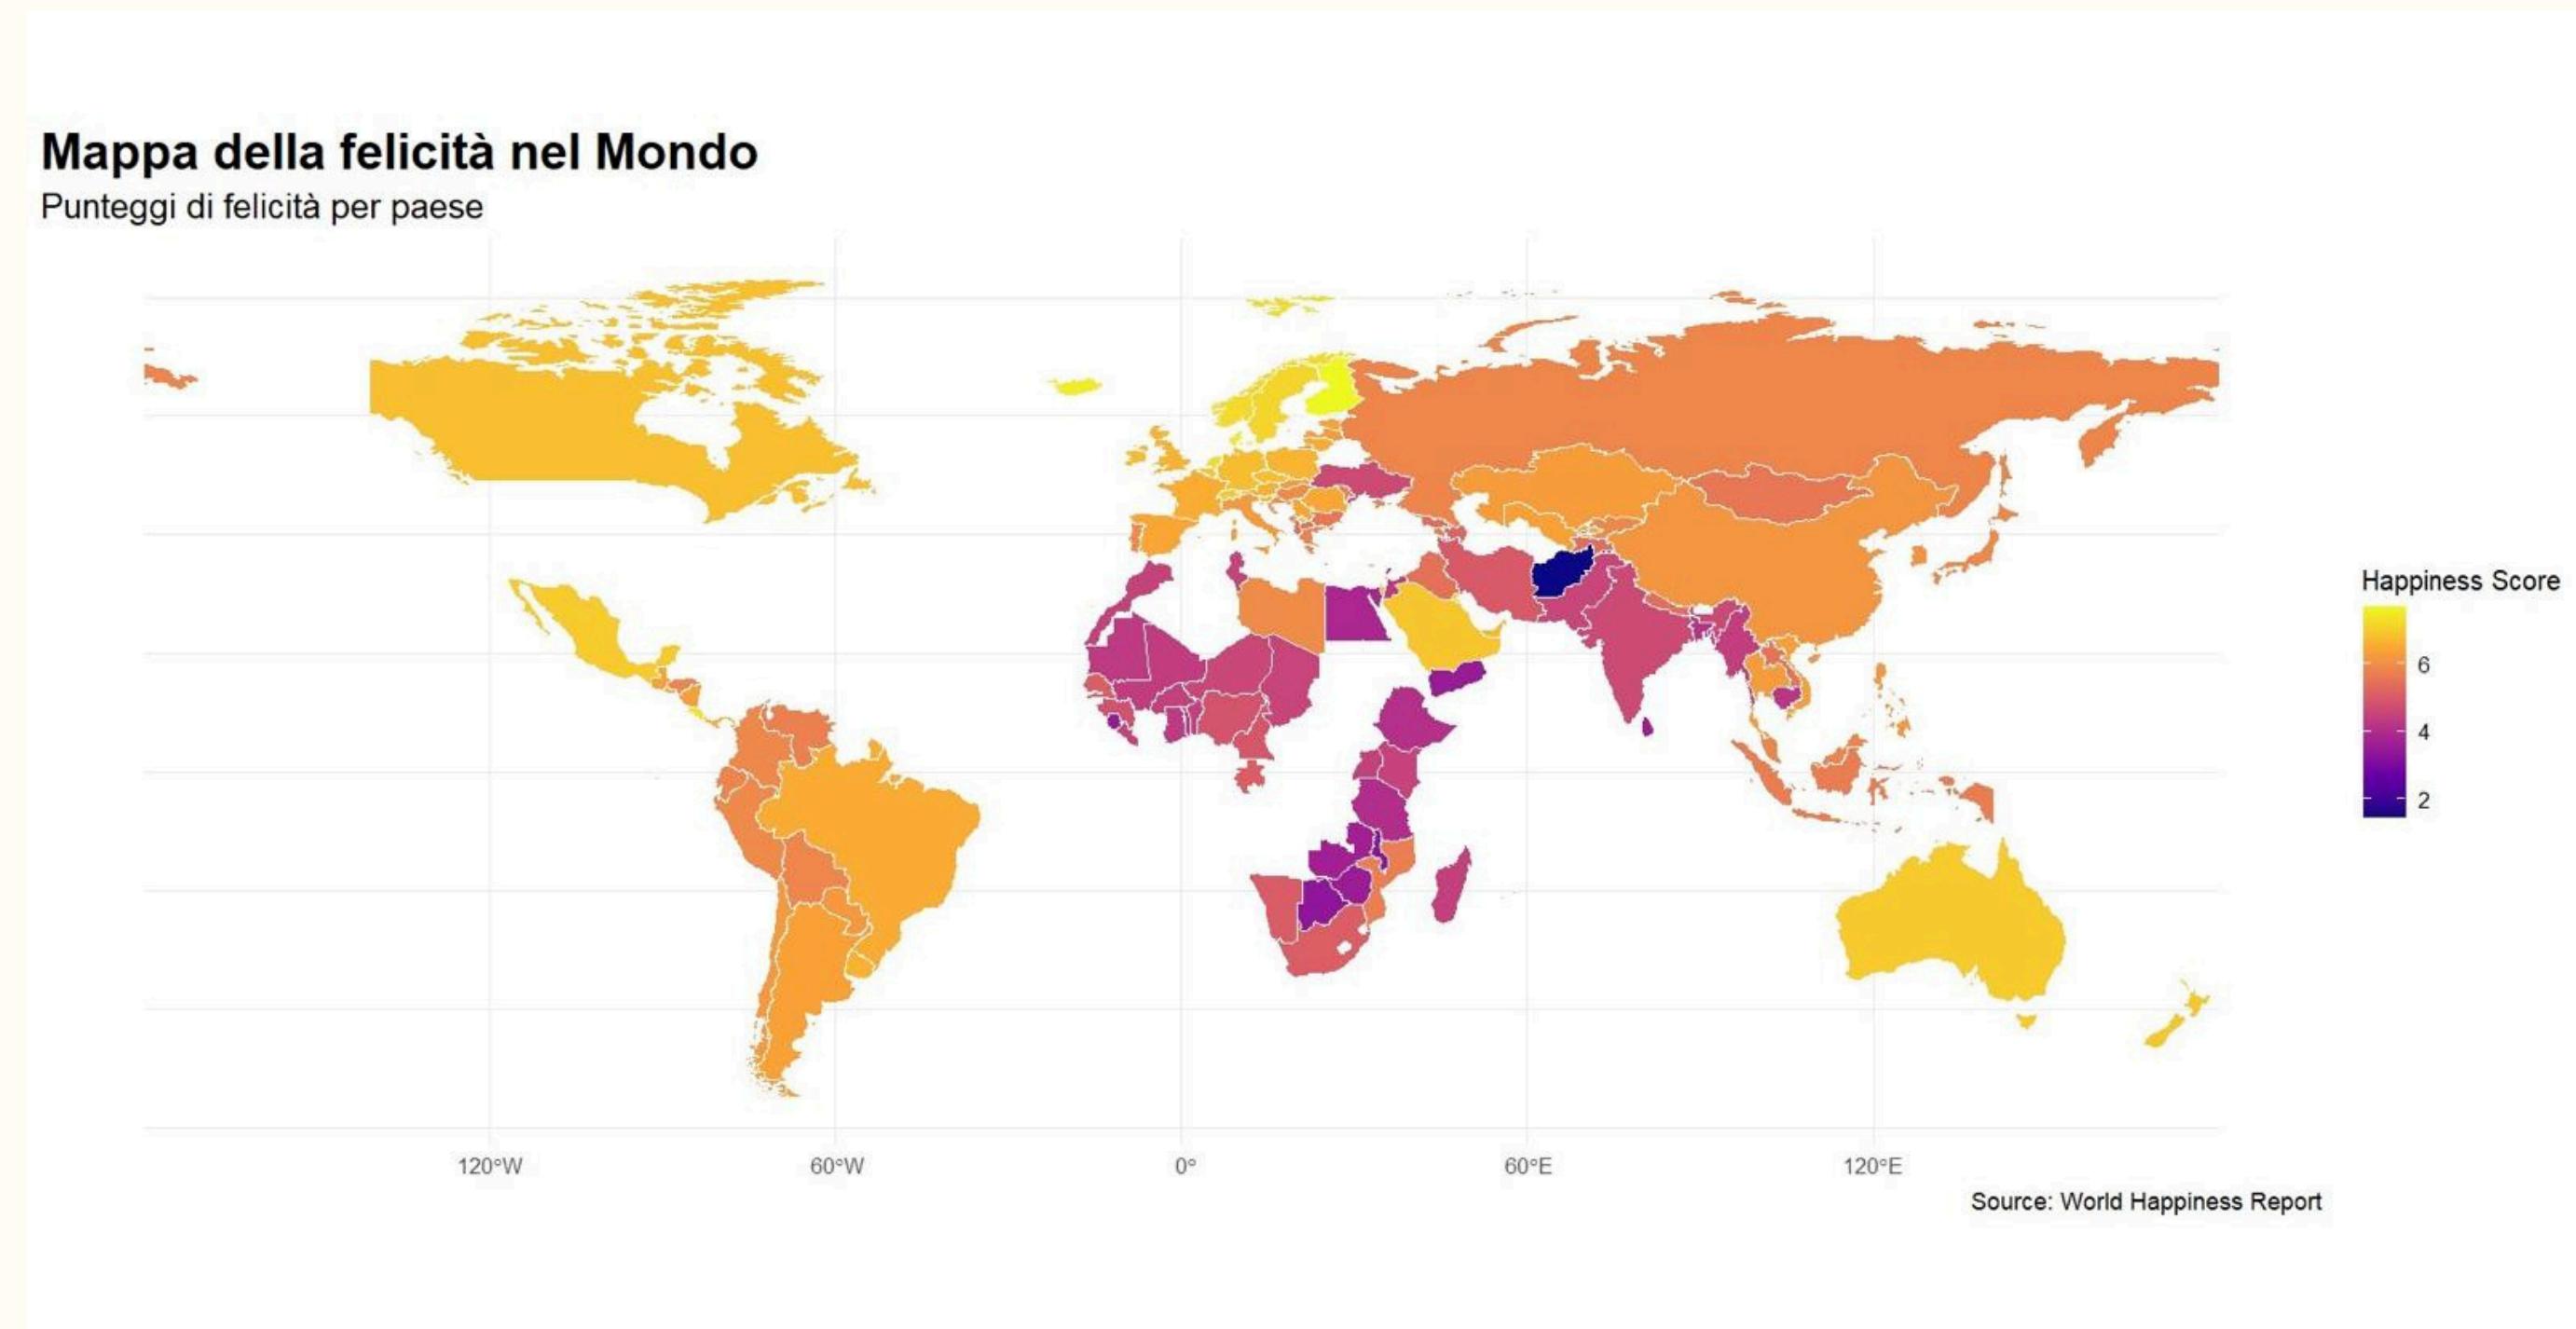

Il Dataset e le variabili

- Fonte: Word Happiness Report (<https://worldhappiness.report/ed/2024/#appendices-and-data>)
- dataset sulla felicità nel 2024 che comprende 11 variabili:
 - Country
 - Year
 - Life Ladder
 - Logged GDP per Capita
 - Social Support
 - Healthy Life Expectancy at birth
 - Freedom to Make Life Choices
 - Generosity
 - Perception of Corruption
 - Positive Affect
 - Negative Affect

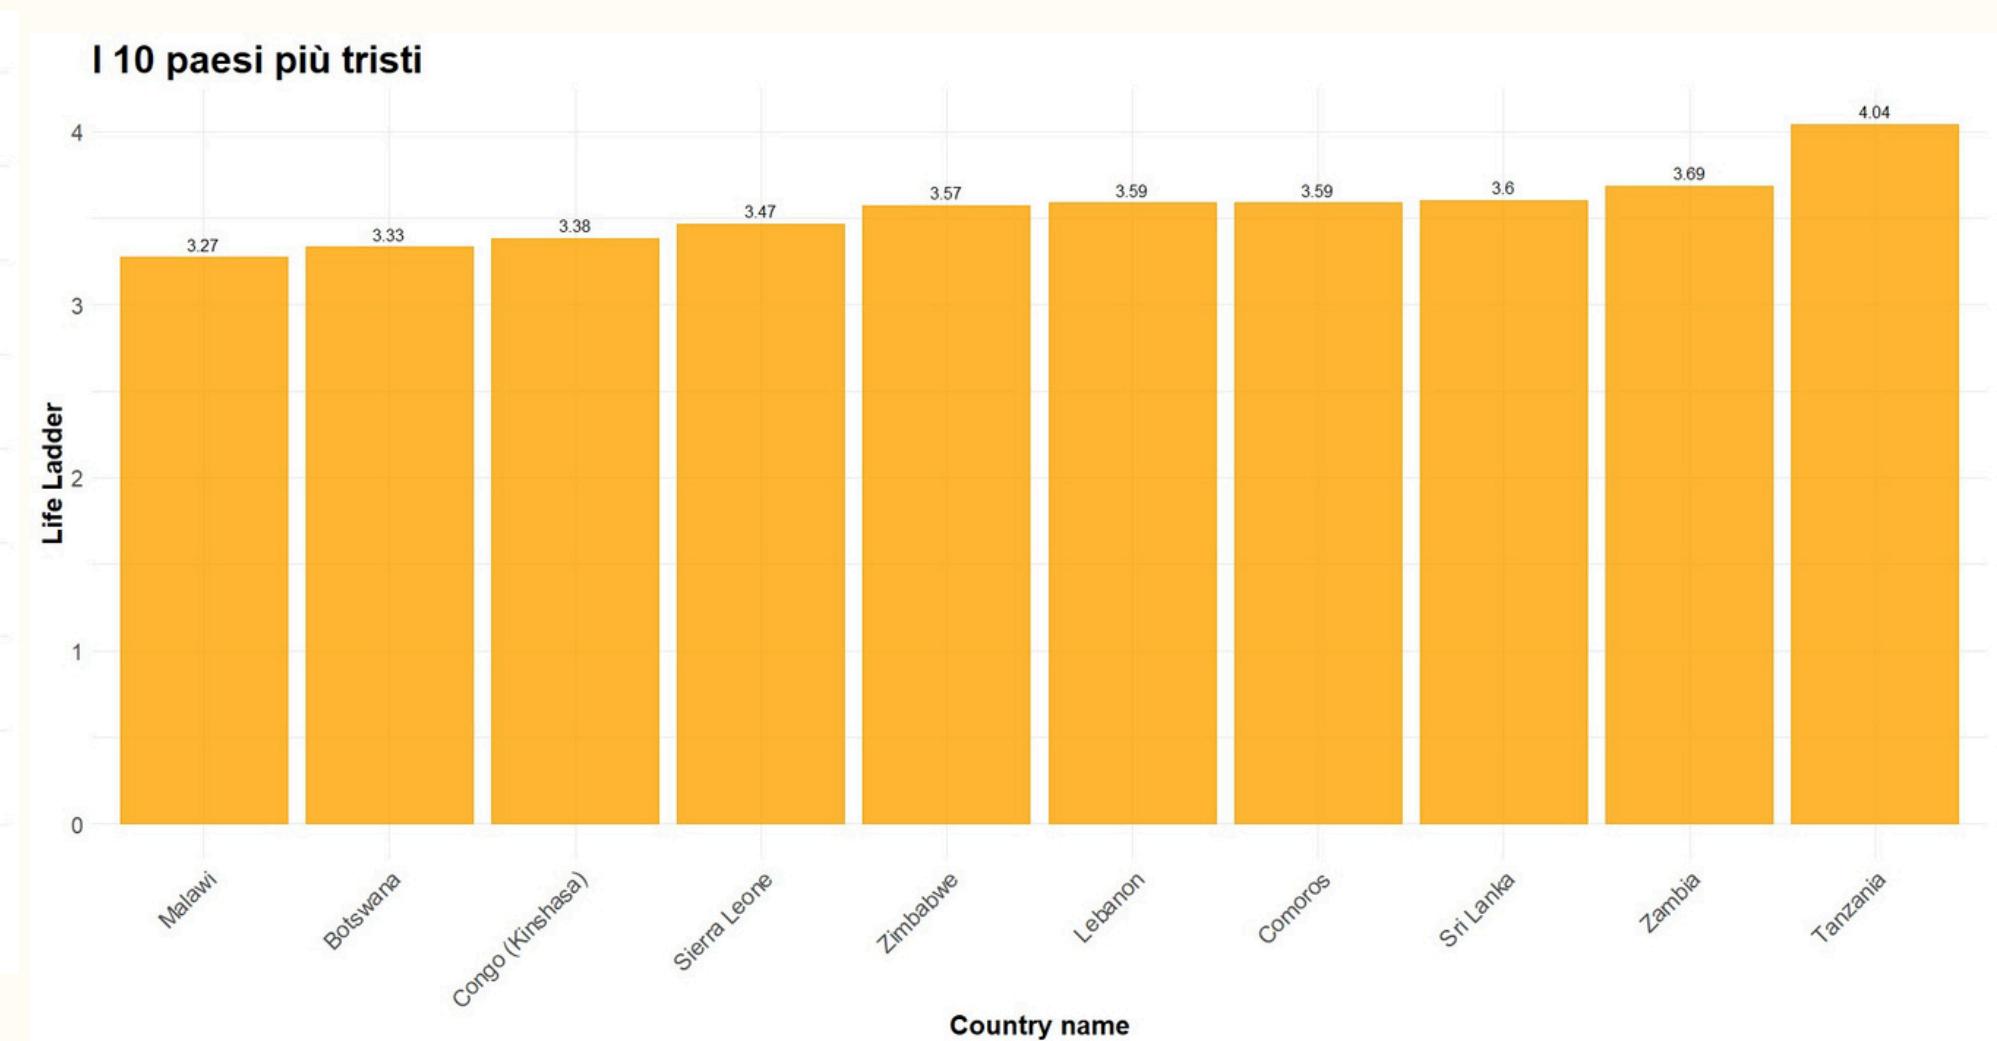

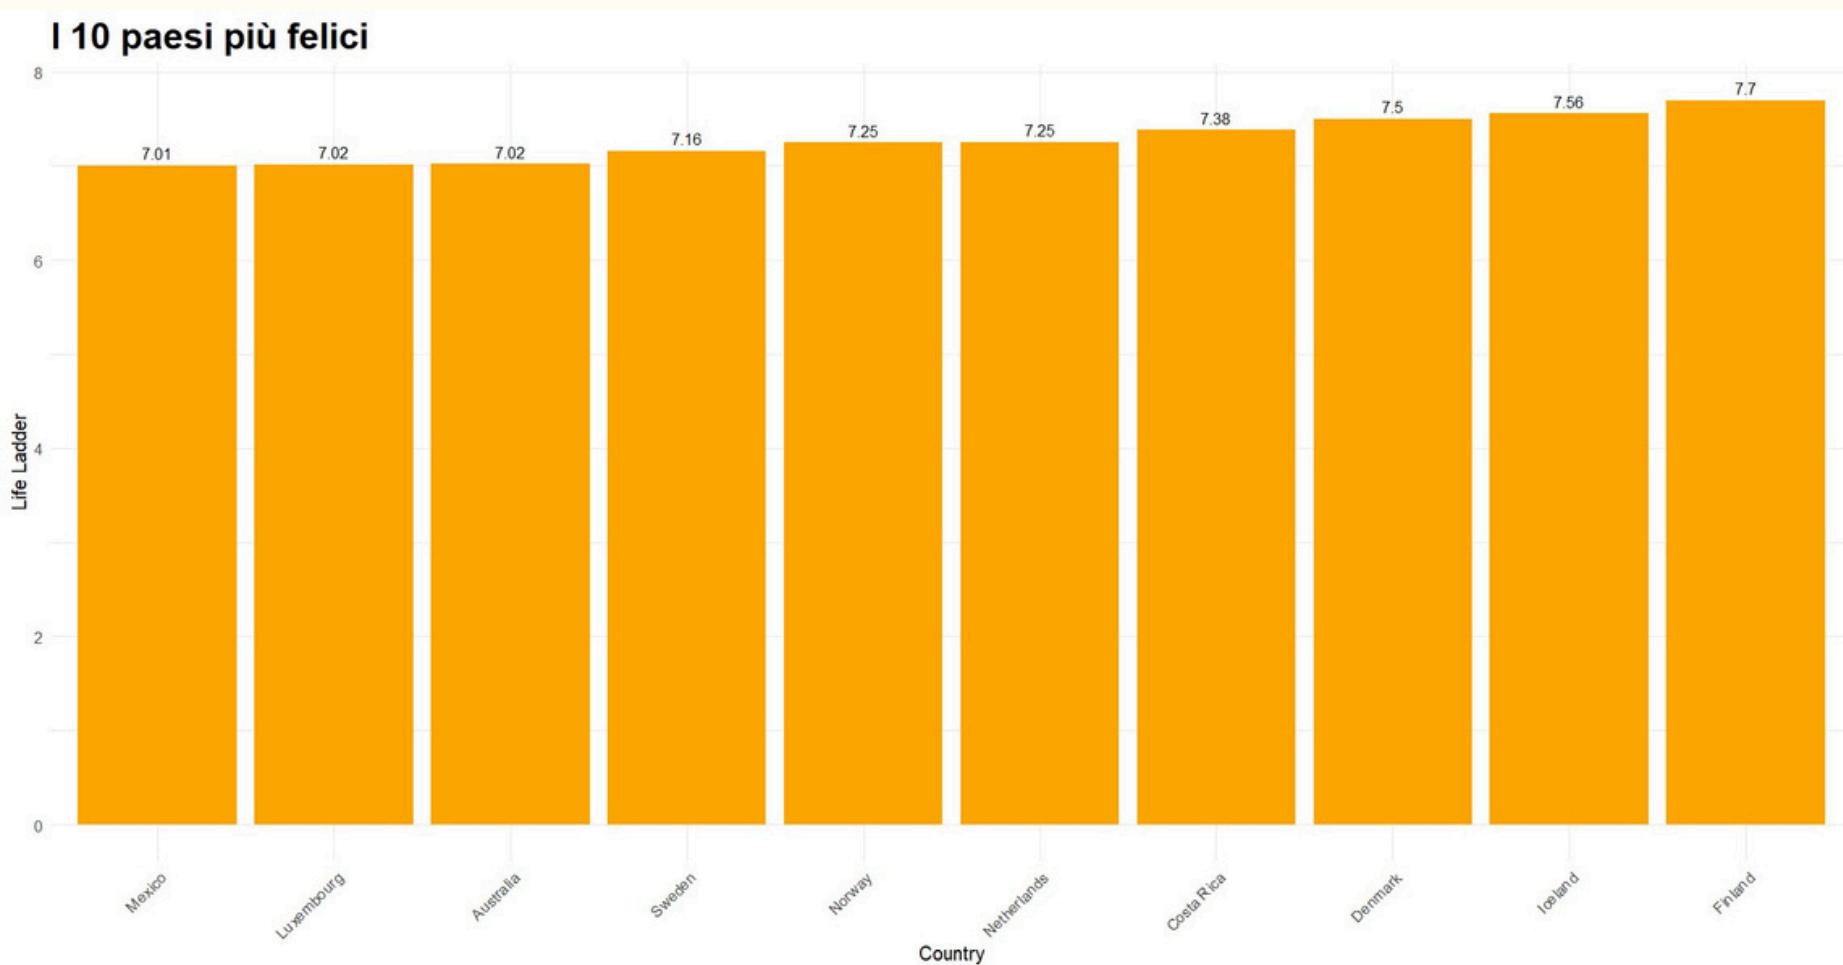

Dati summary

Conclusioni

Comprendere questi fattori è fondamentale per sviluppare politiche pubbliche mirate a migliorare il benessere dei cittadini e promuovere la felicità e il benessere per tutti.

La felicità è un concetto complesso e multidimensionale, influenzato da una vasta gamma di fattori personali, culturali, economici e sociali.

Abbiamo ottenuto una visione più approfondita dei fattori che influenzano la felicità a livello globale.

Continuare a esplorare e comprendere tali fattori è fondamentale per creare un mondo più felice e sostenibile per le generazioni future.

A vibrant, candid photograph of a diverse group of approximately ten young adults, mostly young women, laughing and smiling joyfully. They are crowded together, some holding glasses of beer, creating a sense of fun and social connection. The background is a bright, slightly overexposed outdoor setting.

Domande?

Grazie per l'attenzione!
